VOL. 36 (complete) FUEL PROCESSING TECHNOLOGY DECEMBER 1993

CONTENTS

Special Issue: Third International Rolduc Symposium on Coal Science and Technology and Related Processes, Rolduc, Netherlands, 9-13 May 1993

Preface xi

Sample preparation from bulk samples: an overview
A.M.H. van der Veen and D.A.G. Nater (Eygelshoven, Netherlands) 1

Coal macerals

Determination of coal maceral composition by means of colour image analysis
P. David and W.J.J. Fermont (Heerlen, Netherlands) 9

Image analysis techniques for petrographic analysis
E. Lester, M. Allen, M. Cloke and N.J. Miles (Nottingham, UK) 17

Supercritical toluene extraction of maceral concentrates obtained from Turkish coals
E.S. Vayisoglu, O. Erbatur, K.D. Bartle (Leeds, UK), N.G. Erbatur (Adana, Turkey), B. Harput (Ankara, Turkey), C.E. Snape and R. Garcia (Glasgow, UK) 25

Chemical and petrographical characterization of representative samples of vitrinite and exinite concentrates
W.J.J. Fermont, J. Joziasse, K.A. Nater and A.M.H. van der Veen (Eygelshoven, Netherlands) 33

Analytical procedures for large-scale preparation of maceral concentrates
W.J.J. Fermont, J. Joziasse, K.A. Nater and A.M.H. van der Veen (Eygelshoven, Netherlands) 41

Combustion

An investigation into the effectiveness of fireside fuel additives
A.J. Lowe, D.J.A. McCaffrey and D.G. Richards (Cheltenham, UK) 47

Modelling of fixed bed combustion
N.W.J. Ford, M.J. Cooke and P.W. Sage (Cheltenham, UK) 55

Sulphur retention by limestone particles under PFBC conditions
A.B. Fuertes, G. Velasco, E. Fuente, J.B. Parra and T. Alvarez (Oviedo, Spain) 65

Sulfur retention in AFBC. Modelling and sorbent characterization methods
J. Adánez, F. García-Labiano and P. Gayán (Zaragoza, Spain) 73

The evolution of porosity and intrinsic reactivity of coke particles
J.E. Hustad, D. Vareide and O.K. Sonju (Trondheim, Norway) 81

Combustion in the burnout stage: the fate of inertinite
J.M. Vleeskens (Petten, Netherlands), R.M. Menéndez (Oviedo, Spain), C.M. Roos (Petten, Netherlands) and C.G. Thomas (North Ryde, NSW, Australia) 91

The effect of operating conditions on char produced in a drop-tube furnace
E. Lester, M. Cloke and M.J. Miles (Nottingham, UK) 101

Nitrogenous emissions from the Delft pressurized fluidized bed combustor
C.M. Verloop, J. Andries and K.R.G. Hein (Delft, Netherlands) 109

Laboratory measurement of N release under combustion conditions and comparison with plant NO_x formation
C.K. Man, K.J. Pendlebury and J.R. Gibbins (London, UK) 117

The smokeless fuel - properties and testing methodology
M. Sciazko, K. Kubica and S. Rzepa (Zabrze, Poland) 123

Effects of coal ash properties and burning temperature on behavior of minerals with vitrification and sintering of ash
T. Kojima, T. Ohtani (Tokyo, Japan), T. Shimizu and T. Furusawa (Niigata, Japan) 129

Coprocessing

Model compound studies on coal/oil coprocessing chemistry. Part I. Sulfur-hydrogen compound interactions
P.D. Clark, R. Byrne, R.A. Clarke, C.G. Jones and M.J. Kirk (Alberta, Canada) 137

Coprocessing of a sub-bituminous coal with liquid fractions derived from Athabasca bitumen
A. Chakma (Alberta, Canada) 147

Molten halide catalysts for coal-bitumen coprocessing under low severity conditions
A. Chakma (Alberta, Canada) 155

Coprocessing of coal and asphaltenes-derived coal catalysed by Zn and Mo sulphides
A.M. Mastral (Zaragoza, Spain) and J.M. Palacios (Madrid, Spain) 161

Liquefaction

Influence of the type of solvent on coal liquefaction with different catalysts
I. de Marco, B. Caballero, M.J. Chomón, J.A. Legarreta and P. Uria (Bilbao, Spain) 169

Iron catalyzed hydrogenation of high sulphur content coals
A.M. Mastral, C. Mayoral, M.T. Izquierdo and C. Pardos (Zaragoza, Spain) . . 177

Gasification

Comparison of the gasification behaviour of a West and East German brown coal
H.-J. Mühlen, F. Sowa and K.H. van Heek (Essen, Germany) 185

Application of Monte-Carlo simulation of char gasification in a fluidized bed gasifier
F. Sowa, H.-J. Mühlen and K.H. van Heek (Essen, Germany) 193

Measurement and evaluation of gasification kinetics of sawdust char with steam in an experimental fluidized bed
T. Kojima, P. Assavadakorn and T. Furusawa (Tokyo, Japan) 201

Combustion and CO_2 gasification of coals in a wide temperature range
T. Kyotani, K. Kubota, J. Cao, H. Yamashita and A. Tomita (Sendai, Japan) . . 209

Analysis of local reactions in a laboratory scale jetting fluidized bed coal gasifier
T. Kimura, J.C. Bi, S. Uemiya and T. Kojima (Tokyo, Japan) 219

Performance of a fluidized bed coal gasifier with various ways of gas introduction
M. Matsukata (Osaka, Japan), Y. Honda, H. Yoshitake and T. Kojima (Tokyo, Japan) 227

Steam gasification kinetics and burn-off behaviour for a bituminous coal derived char in the presence of H_2
M. Weeda, H.H. Abcouwer (Amsterdam, Netherlands), F. Kapteijn and J.A. Moulijn (Delft, Netherlands) 235

Anomalous carbon dioxide gasification behaviour of high temperature coal chars
M. Weeda, F. Ermers, B. v.d. Linden (Amsterdam, Netherlands), F. Kapteijn and J.A. Moulijn (Delft, Netherlands) 243

Hydrogen measuring probe for coal gasification processes
A. Jacobs, J. Vangrunderbeek, H. Beckers, F. De Schutter, J. Luyten (Mol, Belgium), R. Van Landschoot and J. Schoonman (Delft, Netherlands) 251

Combustion and gasification reactivities of hydropyrolsis chars: Effect of pressure and heating rate
A.J. Güell, H.-Y. Cai, D.R. Dugwell and R. Kandiyoti (London, UK) 259

Beneficiation

Microbial coal desulfurization in an airlift bioreactor by sulfur-oxidizing bacterium *Thiobacillus ferrooxidans*
H.W. Ryu, Y.K. Chang and S.D. Kim (Taejon, Korea) 267

Ecological problems concerning the amelioration of Slovak energetic coals
J. Lukác (Kosice, Slovakia), R. Alvarez (Madrid, Spain), L. Turcaniova (Kosice, Slovakia), C. Clemente and D. Gómez-Limón (Madrid, Spain) 277

Biomass processing

Comparison of the pyrolysis of different types of biomass and coals
W. Klose and V. Stuke (Kassel, Germany) 283

Flash pyrolysis kinetics of pine wood
B.M. Wagenaar, W. Prins and W.P.M. van Swaaij (Enschede, Netherlands) . . . 291

Beneficial effects of hydrogen pressure in the pyrolysis of biomass: A study of *Euphorbia rigida*
F. Gercel, M. Citiroglu, C.E. Snape (Glasgow, UK), E. Putun (Eskisehir, Turkey) and E. Ekinci (Istanbul, Turkey) 299

Pyrolysis

Modification of coke properties as a consequence of coal preheating
R. Alvarez, J.J. Pis, M.A. Díez, J.A. Menéndez, J.B. Parra, E. Alvarez, C. Suárez (Oviedo, Spain) and M. Sirgado (Avilés, Spain) 307

FTIR study of structural modifications induced by successive oxidation and artificial maturation reactions on raw and preheated coals
J. Kister, O. Ruau (Marseille, France), R. Alvarez, M.A. Díez and J.J. Pis (Oviedo, Spain) 313

Distribution of the activation energies for the thermal decomposition of organic and pyritic sulphur in coal
A.J. Bonet, J.V. Ibarra, M.J. Lázaro and R. Moliner (Zaragoza, Spain) 319

Effect of H_2-pressure on yields and structures of liquids from the hydropyrolysis of maceral concentrates
A.J. Güell, F. Wu, C.-Z. Li, E.S. Madrali, D.R. Dugwell and R. Kandiyoti (London, UK) 327

Effect of operation variables in the obtention of tailored active carbons from coals
J.C. Sousa (Maringá, Brasil), M. Mahamud, J.B. Parra, J.J. Pis and J.A. Pajares (Oviedo, Spain) 333
